

Vibration Absorber

Vibration Absorber for AR51A-07

Description

The MU50013 is vibration absorber tray designed for GPS – Disciplined Rubidium nlock model AR51-07.

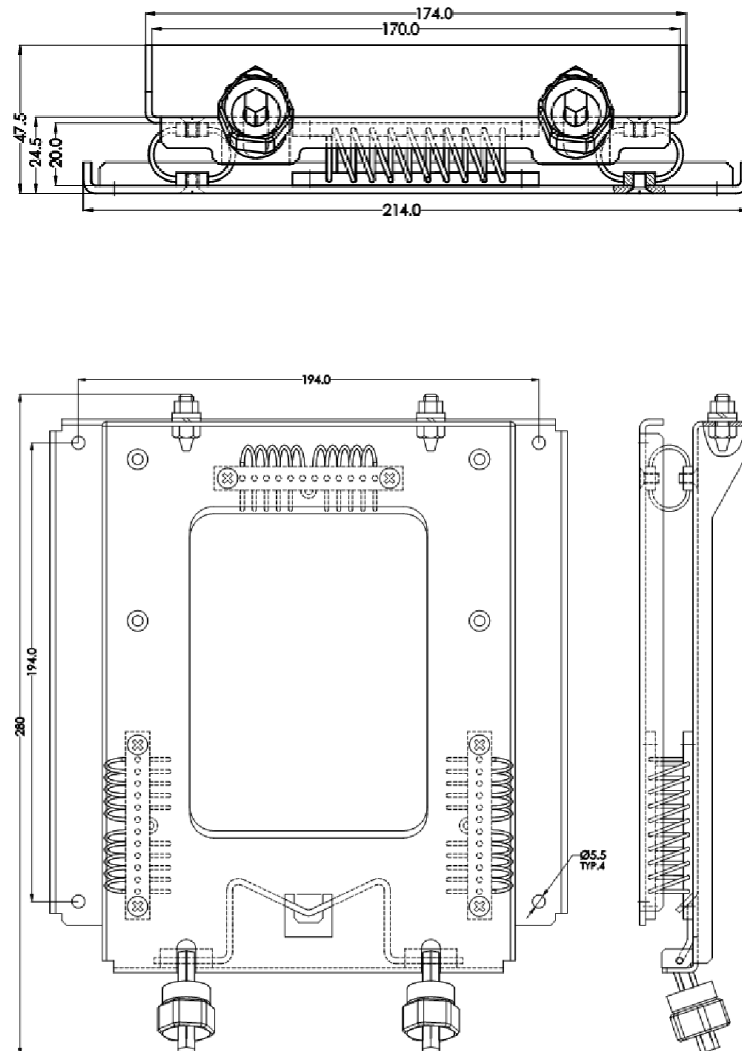

The tray should be use in harsh environmental where **high vibration level** is applied, the absorber decrease the vibration level, so the clock obtain lower vibration level.

The mechanical design of the tray, allows **rapid connection and disconnection** of the clock from the try, without use of any working tools.

All specs are @ 25°C, quiescent conditions and sea level ambient unless otherwise specified

Mechanical ICD

Weight: < 1Kg
